

# haid-tec MelaminPlusPad®

## Optimal result, less effort!

MelaminePlusPads® were specially developed for cleaning mineral floor coverings, fine stoneware tiles, natural stone, cast stone and structured surfaces.

### Composition

The haid-tec MelaminPlusPads® are made of a special material composition, allowing for excellent mechanical cleaning performance. After several years of research, it has been possible to **enhance and compress high-quality melamine foam** and **selected additives** using special adhesives. This process results in an **extremely high tear resistance and durability**. As a result, completely new applications become possible.

### Benefits and performance

- Excellent mechanical cleaning results
- Usage: Basic cleaning, maintenance cleaning, and special cleaning
- Flooring can be maintained in a condition close to new
- High durability with approximately 10,000 square meters per pad
- Floors are cleaned with minimal effort and time
- Compatible with all common cleaning agents

#### EFFECTIVE ON NUMEROUS TYPES OF FLOORING

Excellent cleaning results on mineral and resilient floor coverings

#### IMMEDIATE COST SAVINGS

Convincing durability. The use of chemicals can be reduced in most cases. Basic cleanings can be avoided.

#### ENVIRONMENTALLY FRIENDLY

Reutilization/recycling of German melamine resin foam. Reduction of aggressive chemicals.

#### PRECISION FIT

We provide the perfect pad for every machine:

- For single-disc machines
- For scrubber-dryers with a center lock recess
- For orbital/excentric machines with a high-strength Velcro back
- Custom-made solutions for compact scrubber-dryers.
