

haid-tec PinkPowerSaver

Brings power to the machine

We have developed the PinkPowerSaver Pads for machines with large pad driver. These pads extend the battery range of the cleaning machine by using a unique blend of materials to create less friction on the floor while delivering great cleaning results.

Composition

The haid-tec PinkPowerSaver Pads consist of a **novel combination of German melamine resin foam and polyester scouring fleece**. This unique mixture ensures improved water flow, less friction and therefore energy savings while at the same time delivering a very high cleaning performance.

Benefits and performance

The pad extends the battery range of your cleaning machine. The engine is put under less strain. Even a machine with a small battery capacity can be used to clean a large object without recharging.

Additional advantages:

- Excellent mechanical cleaning results
- Long service life of approx. 20,000 square meters per pad
- Floor coverings can largely be kept in new condition
- Use: basic cleaning, maintenance cleaning, special cleaning
- Floor coverings: porcelain stoneware, tiles, cast stone, PVC / vinyl, linoleum, rubber, epoxy floors

ENERGY SAVING

Less friction with very high cleaning performance.

IMPROVED WATER FLOW

New combination of Melamine resin foam and polyester scouring fleece ensure longer service life and removal of coarse dirt.

LONGER SERVICE LIFE

Compared to pure white MonoMelaminePads the service life is approximately 30 times longer

HIGH QUALITY RECYCLED PRODUCT

Made from recycled Melamine resin foam, saves water and cleaning chemicals.

WORK ECONOMICALLY

Less personnel and use of chemistry necessary.
